

Assignment - Narration as the glue that binds a short piece together

In the previous section both teachers and students created narration tracks. Let's now extend the previous sections on Interviews and Cover Shots together with Narration.

One possible subject - IE Understanding the different levels of Government in Canada
3 interview subjects - Justin Trudeau, Elizabeth May and Gregor Robertson. Script a sound bite for each - students don't even need to conduct a full interview. Teacher could script sound bite for this section.

Write narration track to 1. Introduce subject, 2. Narration in between interviews, 3. Conclude piece.

This can simply be a written assignment, planned out with powerpoint type of presentation or put it all together in a finished video piece.

Or record the narration bits without having the interviews.

Alternatively you could have 2-3 stock interviews that students can use to create a narration track around what the interview subjects say.
