

PIC COLLAGE

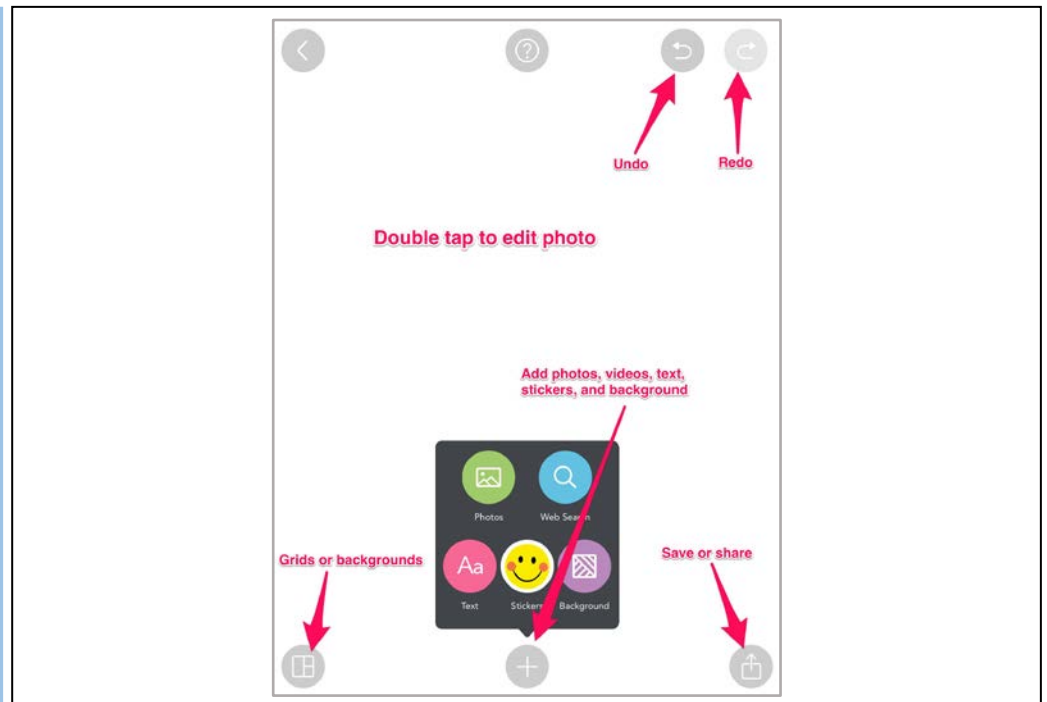

Introduction

Pic Collage is a picture-collaging app that can be easily integrated into any curriculum. You can combine photos, Youtube videos, fonts, stickers, and cutouts to create collages. You can also print completed collages and share on Instagram Facebook, Twitter, and iMessage.

Integration Ideas

- Visual introduction
- Summary – Create collages to summarize a fun day, a weekend, or what they learned during the week at school
- Digital greeting cards
- Book report – Have students develop book covers for books they have read
- Descriptive Writing – Create a photo collage about the event or concept that they need to write about
- App Smash!
- Math visualization

- Open Pic Collage and tap on **Start from Scratch**.
- Let's change the background of your Pic Collage. Tap on the + sign at the bottom or double tap anywhere on the screen. Tap **Background** and choose one of coloured backgrounds or tap on the magnifying glass to search for an image to use as your background.
- Double tap the screen or tap on the + sign. Tap on **Photos** and add a couple images from your photo library by simply tapping the photos you would like to add then tapping the check mark in the upper right hand corner.
- Move the photos around and resize them with the two finger pinch.
- Double tap the screen or tap on the + sign. Tap on **Text** and add some text describing the images you just added.
- Change your font style by tapping on one of the options given. If you swipe right to left on the fonts you will notice that you have many font styles available.
- Change the colour of your font by tapping on **A**. You can also add a coloured background behind your text by tapping on the **Spilling Paint Bucket** icon and tapping one of the colours that appears.
- Tap on the **Check** symbol when finished.
- You can email you completed collage, post to social media or share to other apps.
