

Alternate All-Turn-It Spinner Overlays

We have included three bonus sets of laminates to demonstrate how Ablenet's All-Turn-It Spinner's default dice overlay can be altered to increase the versatility of the device. This overlay kit includes:

- Number laminates, 1-12, along with mathematical symbols (+, -, x, ÷, =)
- Colour laminates
- 6 blanks for you to make your own right away.
(*Tip: Sharpie Fine Point Permanent Markers work and dry very well on laminate.)

To use them on the All-Turn-It Spinner, turn over the included green dice overlays to their blank sides. Please note the Velcro that has been added on the underside of the larger All-Turn-It Spinner overlay is the hook side (the rougher side), while the Velcro adhered to the removable laminates is the loop side (the fuzzier side).

For many great ideas on how to get the most out of your All-Turn-It Spinner in an inclusive classroom, please see the article entitled [Ways to Use All-Turn-It Spinners](https://www.setbc.org/2016/09/004-class-leader-kit/) that will be available with other resources at: <https://www.setbc.org/2016/09/004-class-leader-kit/>.
