

# NANAIMO GEOTOUR PROJECT

## PHOTOGRAPHER COMMUNICATION FORM

**Location: NECK POINT**

**Focus: Igneous Rocks**

- Good examples of basaltic volcanic rock formed on the sea floor.
- Sea-floor Volcanic rock
- Rock is a pillow-basalt
- Pillows are easily visible on multiple outcrops

**Shots that Earth Science students would like to have from this location:**

1. Pillow basalts from a distance
2. Close-up of pillow basalt showing wrinkling
3. Picture of the basaltic volcanic rock
4. Video of information being given to other students
5. Landscape picture of the beach site

**Provide/Insert a few visual examples of what you have in mind...**
