

Clicker7 How to: show Instant Pictures in a Document

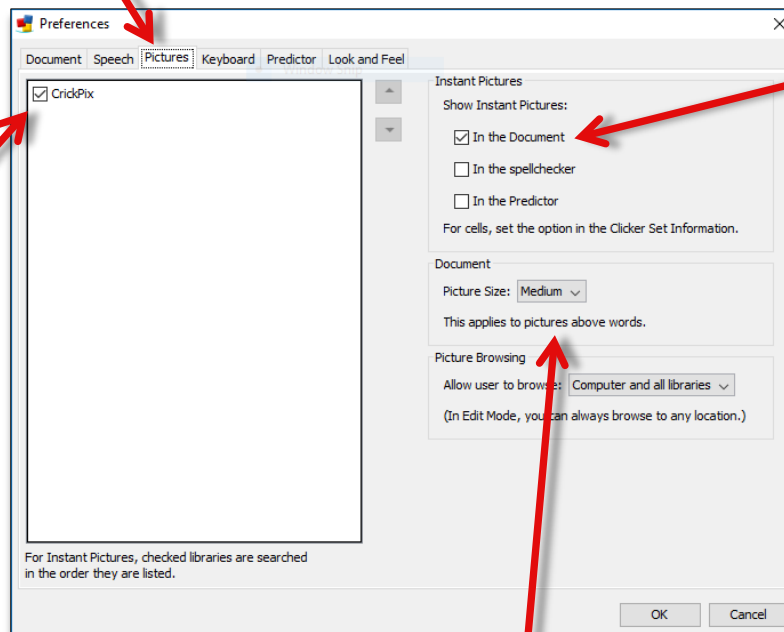

Clicker 7's Instant Pictures feature enables images to automatically appear when words are typed into Documents.

From the **Options** ribbon tab, select **Preferences**.

Select the **Pictures** tab.

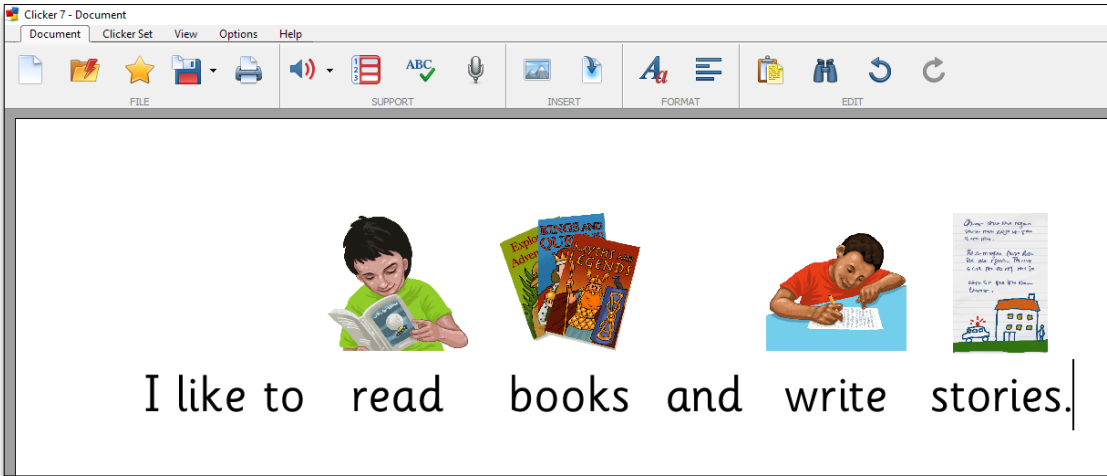

Select the libraries you wish to use.

Choose **In the Document**.

Select the size of the images when they appear in the Document.

As students type, Instant Pictures appear above words in the Document.

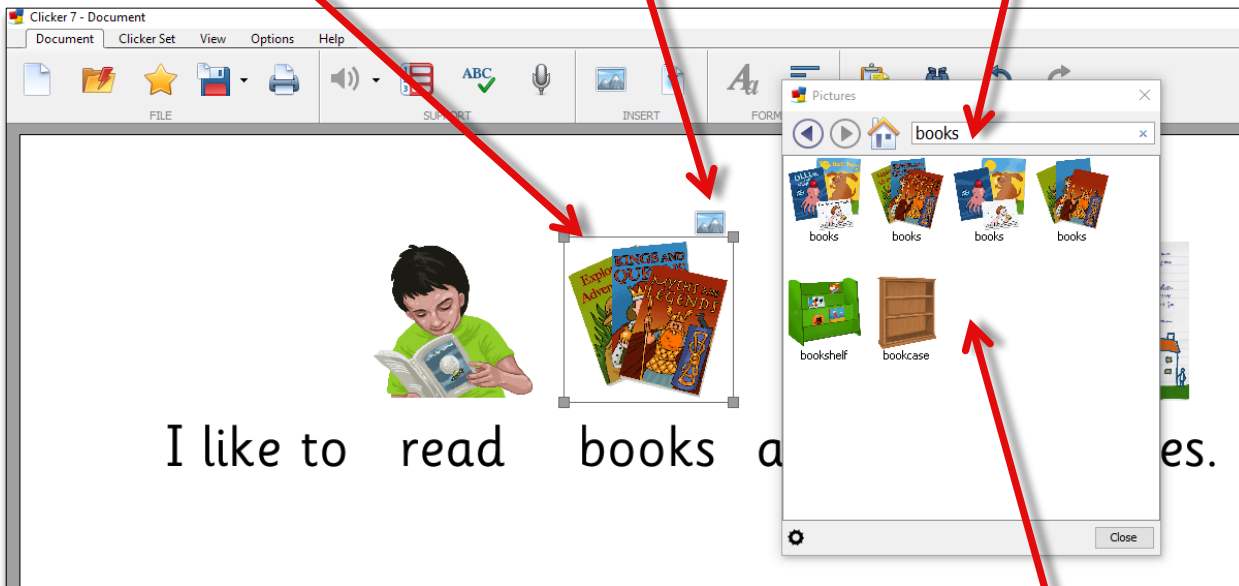

You are able to look for alternative pictures.

Select the image.

Click on the **Picture** icon and select **Browse**.

Alternatives will automatically be searched for.

Select a different picture or search for something else.

Did you know?

You can create shortcuts to folders by clicking the bottom left cog icon when browsing.
